Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6,9-14,17 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Segati (US Pat 5,060,827).

The Segati reference discloses a blow molded cup and container apparatus comprising a measuring cup 18 with a closed base 62, open mouth (unlabeled), an upper wall 70 with a threaded, and a side wall portion (68,64) forming integral shoulder therewith (see Fig. 3), a a container 12.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7,8,15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Segati in view of Sprick (US Pat 5,794,803).

The Segati reference discloses a container and cup arrangement (supra), but does not disclose longitudinal striations on the cup. The Sprick reference discloses another container and cup arrangement having a cup 48 with longitudinal striations (unlabeled) for the implied reason

Art Unit: 3751

of facilitating grasping and turning of the cup. Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify the Segati cup to have longitudinal striations for the implied reason of facilitating grasping and turning of the cup.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Fuchs et al, Darr and Wolf references pertain to other container and cap combinations with associated fastening means.
